Education

Chaudhary Devi Lal State Institute of Engineering and Technology

Sirsa, Haryana

B.Tech in Computer Science Engineering — CGPA: 7.93/10.0

August 2024

Vaish Model Senior Secondary School, CBSE Board

Bhiwani, Haryana

Class XII — PCM with Computer Science — Percentage: 87.2%

July 2020

Vaish Model Senior Secondary School, CBSE Board

Bhiwani, Haryana

Class X — Percentage: 82.17%

May 2018

Technical Skills

Programming Languages: C++, Python, JavaScript

Software Testing: API Testing, Postman, Test Validation, Debugging, Functional Testing

Backend Development: Node.js, Express.js, REST APIs, JWT Authentication, Middleware, Socket.io

Frontend Development: React.js, Next.js, Redux, HTML5, CSS3, Tailwind CSS

Database Systems: MongoDB, MySQL, Mongoose

Developer Tools: Git, GitHub, Linux, Postman, VS Code, Cloudinary

CS Fundamentals: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Projects

Instagram – Real-Time Social Media Platform

[Live](#)

Tech: MongoDB, Express.js, React.js, Node.js, Redux, Socket.io, JWT, Cloudinary, Tailwind CSS

- Engineered a social media application with 9+ features: authentication, profiles, posts, likes, comments, user search, follow/unfollow, real-time chat, and online status.
- Built Node.js and Express.js APIs with JWT cookies, session management, middleware authorization, and MongoDB relationships for users, posts, comments, and conversations.
- Processed image uploads to 1080x1080 using Multer and Sharp before storing secure media URLs on Cloudinary.
- Integrated Socket.io for bidirectional messaging and live status updates between authenticated users.

FoodDash – Modular Food Delivery System

[Live](#)

Tech: MongoDB, Express.js, React.js, Node.js, JWT, Tailwind CSS, Mongoose, Redux, Socket.io, Cloudinary

- Modeled MongoDB schemas for 12+ entities including users, restaurants, menu, menu items, food categories, cart, orders, sessions, deliveries, delivery partners, bank accounts, and OTP data.
- Architected a modular food delivery system with 6+ services for users, restaurants, menus, carts, orders, delivery, and authentication.
- Implemented bcrypt password hashing, JWT authorization, request validation, session management, and role-based access control.
- Created responsive React interfaces for menu browsing, cart updates, checkout flow, and order tracking with reusable components.

NetflixGo – OTT Content Discovery Platform

[Live](#)

Tech: MERN, TMDB API, React.js, Tailwind CSS

- Developed an OTT-style application with 7+ features: authentication, movie discovery, search, trailer playback, watch history, skeleton loading, and custom 404 handling.
- Connected TMDB API for movie and TV content while handling API requests, protected routes, and user-specific history.
- Configured JWT token authentication with Express middleware and React pages for home, search, watch, history, login, signup, and invalid URL flows.

Achievements

- Solved **970+ LeetCode problems** across core Data Structures and Algorithms topics and earned the **1000 Days Active Badge** for consistent coding practice since August 2023.
- Attained a **LeetCode max rating of 1686** through participation in **90+ coding contests**.
- Secured **Global Rank 34,918** on LeetCode, ranking among the **top 1% profiles by problems solved**.
- Earned a **3-Star CodeChef rating** with a maximum rating of **1654** and practiced **100+ CodeChef problems**.
- Ranked **3rd at institute level on GeeksforGeeks** while solving **160+ GFG problems**.

Certifications

- **React with AI Certification – Internshala** [Live](#)
- **Full Stack Web Development Certification – Internshala** [Live](#)
